## Experience/Projects

---

### EY GDS

Oct 2024 – Present

Senior Software Engineer

Bangalore, India

- Developed reusable React Native components to ensure scalability and maintainability across projects.
- Integrated and customized third-party libraries and plugins, improving app performance and user experience.
- Collaborated with and supported cross-functional squads for seamless integration and delivery.

#### Bangkok Bank Mobile Banking:

- Built reusable components and integrated custom/external plugins to streamline application functionality.
- Gained practical exposure to micro-frontend architecture in React Native with Re.Pack, supporting modular development and integration.

### Honeywell

Oct 2021 – Oct 2024

Mobile Developer 2

Bangalore, India

- Contributed to the development of React-Native apps designed for interfacing with Honeywell's HMI (Human Machine Interface) devices & controllers.
- Wrote and maintained clean, efficient, and well-documented code. Conducted code reviews and provided constructive feedback to team members.
- Participated in Agile development processes, including sprint planning and retrospectives.
- Collaborated with cross-functional teams, including designers and backend developers, to ensure seamless integration of features

#### BMS Startup:

[Play Store](#)

- Implemented Bluetooth Low Energy (BLE) communication protocol to retrieve real-time data from controllers.
- Enhanced codebase efficiency and scalability by refactoring 50+ JavaScript files to TypeScript, reducing runtime errors by 40% and improving maintainability of application for the team.

#### Flow Manager:

[Play Store](#)

- Implemented live polling for fetching the live data from the controller after every 5 seconds.
- Used BLE technology to push IO configurations to empty controllers.

### Tech Mahindra

May 2018 – Oct 2021

Software Engineer

Bangalore, India

- Commenced my career as a Mobile Application Developer, collaborating with experienced professionals to create various healthcare apps using React Native.
- Implemented responsive and user-friendly UI components for seamless user experiences. Ensured compatibility of applications across various devices and screen sizes.
- Conducted thorough testing of applications, including unit testing and integration testing.

#### MyBSWHealth:

[Play Store](#)

- Utilized the react-native-map-clustering module to showcase the count of doctors within a specific area.
- Integrated omnichannel chatbot capabilities alongside chat features.

#### BSW Virtual:

[App Store](#)

- Contributed to the development of video conferencing features using platforms such as Jitsi and Twilio for doctor-patient video consultations.
- Redesigned the application's UI to ensure seamless compatibility across various mobile devices and tablets, boosted user retention by 35%.

## Technical Skills

---

**Frontend Technologies:** React-Native, React JS, React-Hooks, Android

**Backend Technologies:** Node.js, Express.js, MongoDB

**Languages:** JavaScript, TypeScript, Kotlin, Java, C

**Testing Frameworks:** Jest Unit Testing, React Testing Library

**Other:** Redux, Redux Toolkit, Redux Saga, Redux Loop, Tailwind CSS

## Personal Projects

---

**DevTinder: Web & Mobile App** | Node.js, MongoDB, React | [Preview](#) | [Source Code](#)

**May 2025 - Dec 2025**

- Developed a full-stack application that allows developers to connect, interact and collaborate. Integrated Socket.io for chat messaging and RozarPay for payment integration.

**Netflix Clone: Web App** | React, Redux Toolkit, Tailwind | [Source Code](#)

**Jan 2024 - Feb 2024**

- Developed a web application in React resembling Netflix, implementing debouncing and caching to optimize search functionalities and integrated chat using API polling, displaying n-level nested comments.

**Food Ordering App** | Android Jetpack Compose, Kotlin, Room DB | [Source Code](#)

**Aug 2023 - Dec 2023**

- Designed an Android application using Jetpack Compose, with added functionalities for searching and filtering dish items.
- Employed navigation-compose for seamless screen transitions and utilized Ktor-Client to fetch API responses, storing the acquired data in a Room Database.

## Education

---

**Indira Gandhi Institute of Technology, Sarang**

**Aug 2013 - May 2017**

*Bachelor of Technology in Computer Science Engineering*

*Dhenkanal, Odisha*
